

## PHOTOGRAPHY & PROJECT PERMISSION SLIP

Our children are discovering new technologies through integrating the learning of safety, programming, and autonomously flying unmanned aerial vehicles (UAVs and/or drones). We plan to share our missions by practicing digital citizenship using social media. Innovative learning models and skills such as the International Society for Technology in Education Standards include sharing projects and research information beyond the classroom to obtain a global awareness and collaboration. I will be working with your child's class to develop this skill.

I am sending you this parental consent form to both inform you of the incredible projects in which we are engaging and to request permission for your child's photo/image and name to be published.

In our classroom we will be working on projects and presentations that may include student-created pictures or videos. Each project is standards-based and if identified in any way, only first names are used. Please sign below if you give permission for your child to share his/her projects via email, our school website, Twitter, or other educational medium to promote and share our learning.

Sincerely,

---

Please return by \_\_\_\_\_ Thank you!
